Memo to File:

RE: Martin-Marrietta
Leamington Cement Plant
ACT/023/004

On February 19, 1980 Tom Suchoski of the Division staff visited with Mr. Lynn Findly of the U.S. Forest Service - Fishlake National Forest. The purpose of the visit was to discuss the surety arrangements for the Martin-Marrietta Cement Plant, as part of the operation lies on Forest Service land and a portion is fee.

Mr. Findly indicated that the Forest Service had estimated a surety of \$386,000.00 to cover reclamation of the site. He also indicated that the Forest Service might be willing to hold the surety on the entire operation until all reclamation work was done. This would allow the State to accept to Forest Service bond.
